Needle & seam sample record

HomeDosh · Blank worksheet · Prepared November 10, 2026

Attach your successful scrap seam and record the actual setup. This sheet records your result; it is not a tested needle recommendation.

What to record	Your setup and result
Machine and required needle system	
Fabric, interfacing and actual seam layers	
Thread brand, line and sizing label	
Needle type and size	
Stitch result and next single adjustment	

> Keep a machine-compatible combination that makes even stitches without thread damage, skipped stitches or unwanted holes. Stop if the needle bends or strikes metal; follow the machine manual rather than forcing the seam.

Companion to HomeDosh's “Sewing Machine Needle Sizes” guide. Editorial record template; no hands-on results claimed.
